

# GENERAL ENGLISH

CRICOS Course Code: 069099C

Our General English (GE) program is ideal for students who would like to improve their English language skills on a vibrant university campus that offers excellent facilities to complement their language learning.

Our team of experienced teachers will focus studies on the 4 main language disciplines of reading, writing, listening and speaking. Students will be given the opportunity to rapidly improve their accuracy, fluency and confidence due to the proven teaching methods used at MIT.

Our General English program is carefully structured and accessible at every level. All aspects of the language are incorporated, such as grammar and vocabulary development with a focus on improving conversation, listening, reading and writing skills using a variety of materials such as course books, newspapers and audio-visual resources. Regular opportunities to engage in computer aided learning in the University

computer labs are provided, along with excursions to places of interest and campus-based learning activities.

We recommend students complete our free placement test to assess their level of English prior to commencing their course. This will allow us to recommend a study pathway, with a suitable duration and direction.

Generally we find that it takes 10 weeks for a student to complete a level. To make sure that students are being challenged and are happy with their progress they will be assessed throughout their course with an official test every 5 weeks. This will give us an opportunity to provide individual feedback on student performance within each of the key language areas.
